Introduction

Today the market is packed with lots of offers for investing and gaining by cryptocurrency (Lending Systems, Trusts). But not all of them are high-quality, profitable and reliable.

Our system would effectively assist in obtaining the maximum profit safely, securely, comfortably and steadily. We have dramatically simplified investing by linking the profit to the exchange rate of our coin. The one and only thing you need to do is to purchase our coin either at ICO (which is cheaper) or at fully-fledged launch of the platform.

Unlike most similar platforms, we generate profits not only by our coin resale, but we trade systems at exchanges with excessive profits. These profits we share with you.

Issue

Most people are trying and have been trying to trade at cryptocurrency exchanges on their own. Very few of them were successful though.

Some of them have been buying 'signals' and trying to work on them. But, as it was obvious from the very beginning, it simply does not work.

The only you got was a waste of money and it is wrong!

At the outset, we were also trading on signals, investing in various funds, ICO. And we lost a lot of money too.

Solution

After a while we accidentally got a new idea that if a new coin was added to coinmarketcap and started being traded at exchanges, it would rise up to 87% (if a coin is ensured somehow). And we started analyzing.

Let's take a look at the screenshot of the page <http://coinmarketcap.com/new/>

 Raiden Network Token	RDN	2 days ago	\$90 091 500	\$1.80	50 000 000 *	\$9 983 240	64.23%

 Aeron	ARN	3 days ago	\$4 973 125	\$0.436354	11 396 996 *	\$64 807	3.84%
 CarTaxi Token	CTX	3 days ago	\$7	\$0.072785	7 *	\$17 362	6.60%

 Credence Coin	CRDNC	4 days ago	\$8 380 790	\$2.53	3 311 492 *	\$488 317	-55.79%
 Unikoin Gold	UKG	5 days ago	\$7	\$0.222609	7 *	\$72 708	-0.15%
 Desire	DSR	5 days ago	\$7	\$0.580280	7	\$1 011 460	9.71%
 ELTCOIN	ELTCOIN	6 days ago	\$7	\$0.001729	7 *	\$3 800	-51.50%
 Pure	PURE	6 days ago	\$7	\$0.424402	7	\$32 626	-6.71%

Now we will calculate a bit (even without the potential analysis of the coin, though we normally do it at our platform) and buy. As the first step our platform would purchase promising coins (manual analysis) and those which are already traded at exchanges.

For instance we would buy each coin for \$1000. In 9 days this purchase would let one earn \$713,40 (if selling the coins for current prices).

Other coins (the second step) shall remain at the platform until they show significant raise, as it was well noticed that every coin is pumped pretty frequently within a short period of time.

EXAMPLE

As a result, our platform provides us a with a **nice profit** and we will pay a part of it to you.

I ICO

Initial coin offering

But to make it work and gain the nice profit we constantly need a big number of free bitcoins. For this reason, we make ICO, where we get your bitcoins for further work. In substitution, we provide you with our coin, index (price) of which increases at the expenses of buy-back. This way you make profit and we receive significant number of means for our platform activity.
