The world is in the middle of a revolution: blockchain technology is the most important invention in computing in a generation replacing centralized proprietary services with decentralized open ones; verifiable ledger transactions using peer-to-peer algorithmic markets. Blockchain, a vast global platform based on a distributed ledger with Bitcoin, Ethereum, and other blockchain networks have proven the utility of decentralized transaction ledgers. The future is today and the time to act is now.

The first lending program with a transparent volatility trading bot. The Bitcoin Growth Bot brings in real returns creating constant demand for Nucleus Coin (NCL) in turn causing the token to appreciate greatly in value.

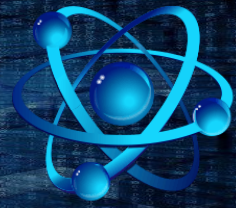

Lending Programs Contain The Largest Growth Potential

Blockchain Technology is revolutionizing most every aspect of our lives. Today the cryptocurrency market capitalization is over \$200,000,000 and by 2020 it is estimated to be over a trillion dollar market. Surveying the landscape over the past year the greatest opportunity in the sector lies in token appreciation through internal demand. The age old economic principle of supply and demand is the way to thrive.

Decentralization Requires Transparency

Using this model we have seen tokens this year rise from \$0.16 to \$281 in less than a year (BCC from Jan 2017 to Nov 2017) and from \$10 to \$88 in less than a month (REC from Oct 2017 to Nov 2017) however in each case without transparency of an actual working algorithm. Bitcoin Growth Bot has a working verified algorithm establishing it as an innovator and leader.

1 Background

The question that needed solving was how can your computer work for you creating money to purchase bitcoin, ethereum, and all other altcoins. You see altcoin mining just isn't worth it anymore. There had to be a better way. The modern day mining project was born. Create money, transfer it to bitcoin, transfer the bitcoin to your cryptocurrency portfolio and hold. You know a money machine, a modern day mining tool.

Then the realization came that the appreciation of a native token using a real volatility trading bot would be vastly superior to possible gains in all other alternative cryptocurrencies.

1.1 The Bitcoin Trading Bot Algorithm

The building of an automated trading program prototype took several months with the programming done in the algorithmic language MQL4 using the Metatrader 4 platform. The outcome of building cryptocurrency algorithm that works has exceeded all expectations resulting in very low risk and solid monthly returns. With the value cryptocurrencies set to increase having an automated trading bot creating money at a very low risk to reward ratio compared to hardware or GPU mining or anything else, using a volatility bot is the best solution to profit in the sector for years to come.

Bitcoin Growth Bot uses an advanced algorithm to profit from market volatility. Due to limited supply of Nucleus Coin (NCL) Coin and internal demand created through access to the Bitcoin Growth Bot only through the use of Nucleus (NCL) Coin the bot becomes literally a money making machine.

1.2 What is Nucleus Coin?

Nucleus Coin (NCL) is a cryptocurrency or digital asset used as a medium of exchange to secure transactions within the Bitcoin Growth Bot ecosystem. Nucleus can be used to lend to the Bitcoin Growth Bot, stake, trade, or transfer funds between users.

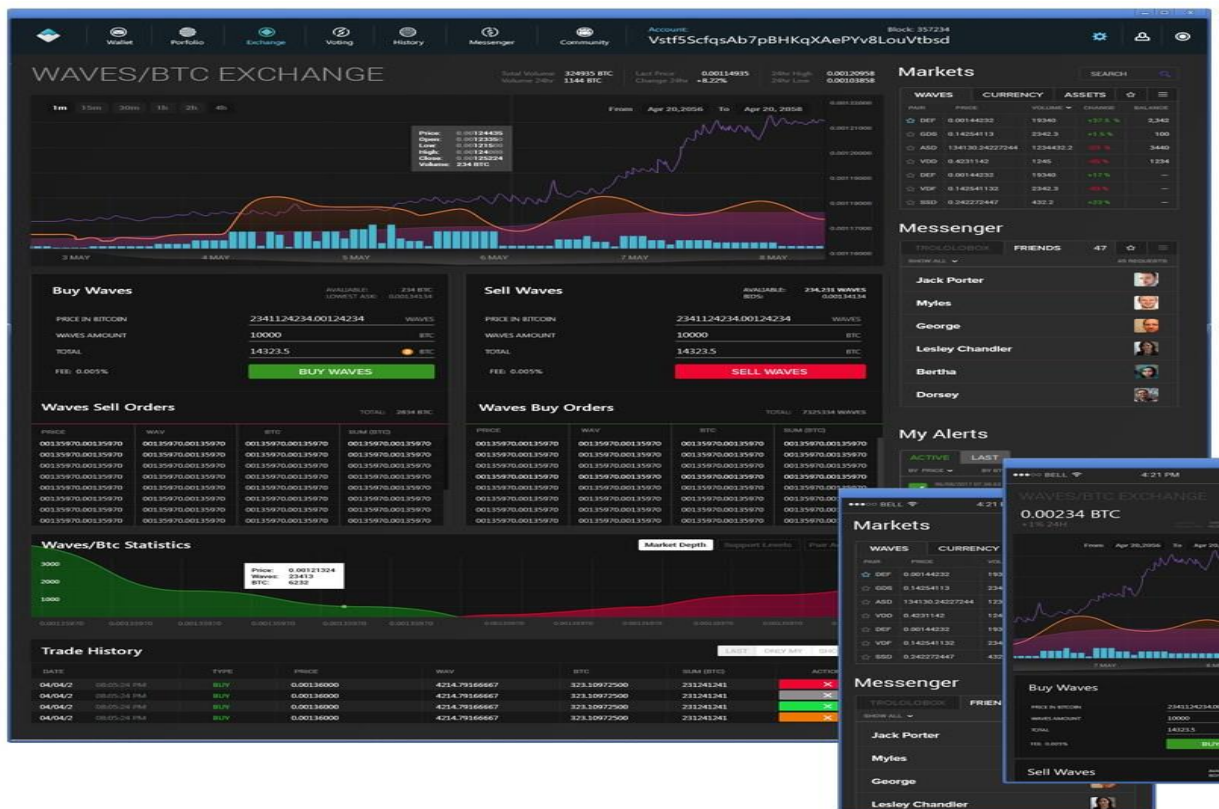

1.3 Custom Application Tokens (CATs)

Nucleus Coin is a Custom Application Tokens, for short CATs, a digital token which is cryptographically secured by the Waves open-source blockchain platform.

1.4 Decentralized Exchange

Waves Dex is a decentralized exchange allows trading using centralized order matching paired with decentralized order settlement. Split second order execution with exchanged funds transferred over the blockchain results in trading as fast as on centralized exchanges, however, the funds never leave a user's account eliminating the risk of an exchange hack.

Nucleus Coin will be listed on the Waves Dex and available for trading immediately.

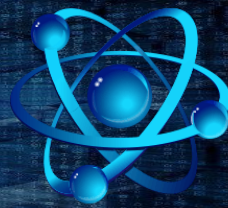

1.5 Nucleus Coin Transaction are Anonymous

Anonymous order books are a must for an industry-grade trading platform such as the Waves Dex. Also to be noted the decentralized blockchain trading offers one custom token against another (asset-to-asset trading).

1.6 The Number of Coins are Limited

Nucleus Coin supply will only have 24 million coins worldwide creating an economic system based on deflation allowing Nucleus Coin prices to rise, appreciating with high demand and limited supply of coins that cannot be increased.

2 Initial Coin Offering (ICO)

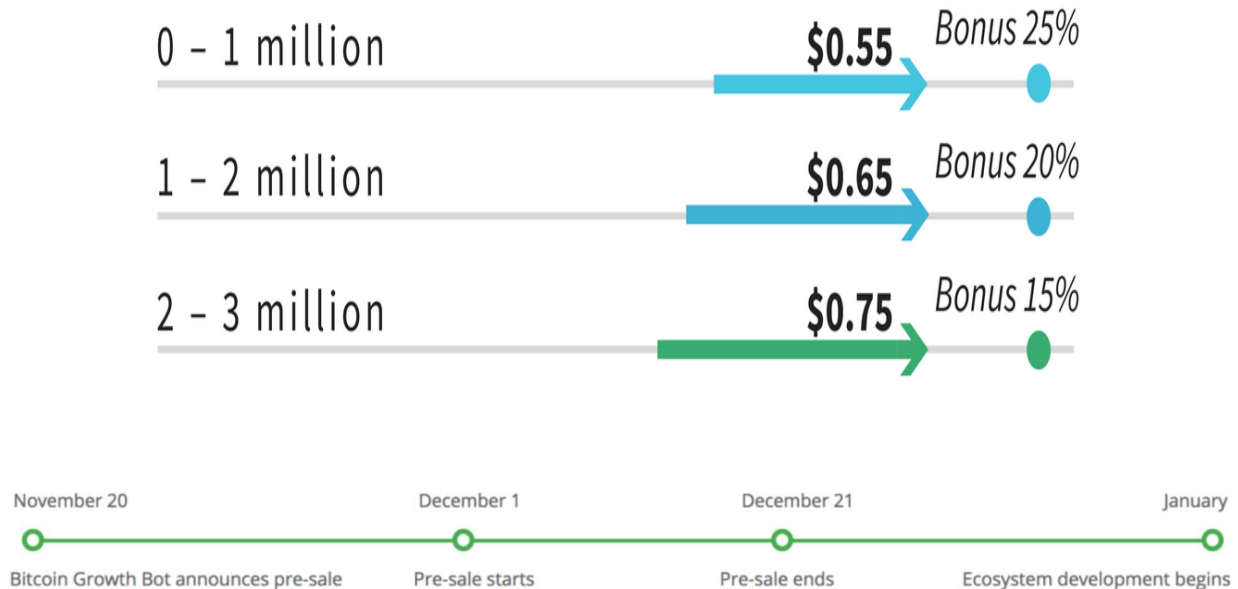

The earliest coin offering before launch into the free market. Early adopters have the opportunity to sell into the ICO or hold for true value token appreciation where the real money will be made on this project.

2.1 Pre-ICO

The purpose of the ICO presale is to raise funds for a large scale marketing campaign bringing awareness across the cryptocurrency landscape of the upcoming ICO on January 15th, the official launch of the Bitcoin Growth Bot, and construction of the Bitcoin Growth Bot ecosystem.

3 million Nucleus Coin tokens will be available for the crowdsale starting on December 1st and ending on December 21st as the pre-ICO.

2.2 ICO Crowdsale

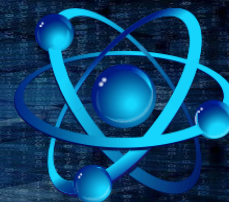

The crowdsale for Nucleus Coin for 4,920,792 tokens will take place on January 15th, 2018 with the price offering between \$2.00-\$3.60.

2.3 ICO Target

The goal of the ICO is to promote Nucleus Coin and the Bitcoin Growth Bot. The objective is for cryptocurrency enthusiasts to obtain Nucleus Coin while price is still competitive.

3 Why Nucleus Coin?

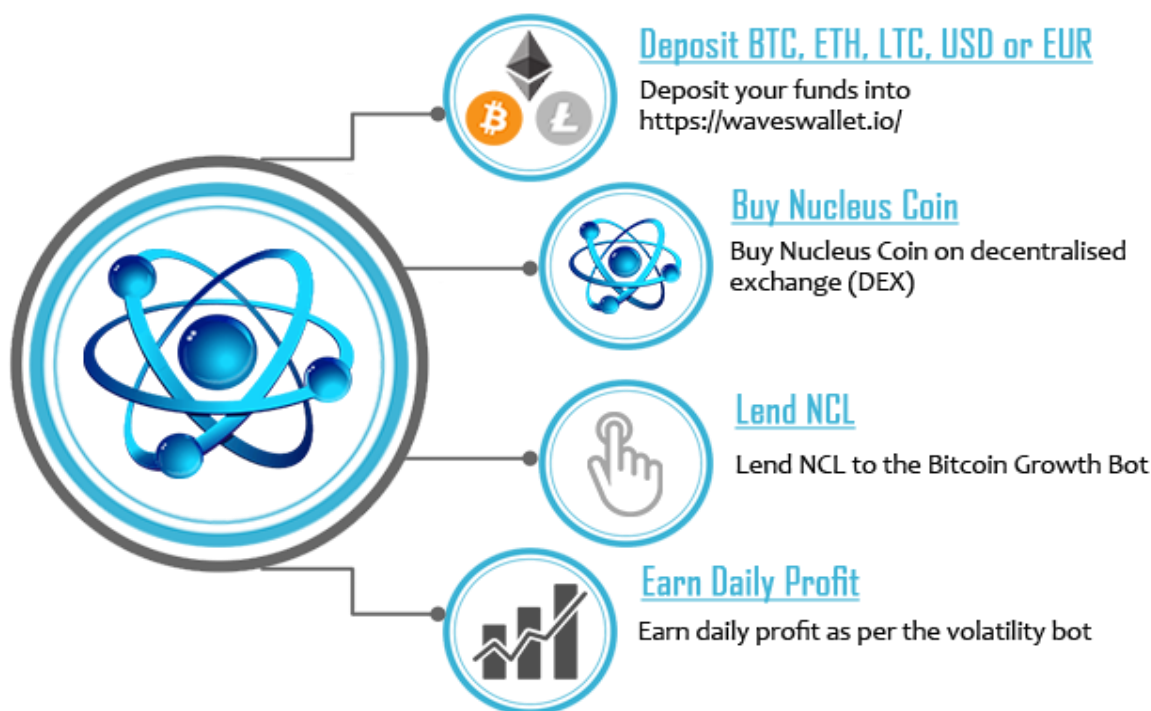

The cryptocurrency sector is in a boom growing from a \$200 billion market today towards a possible multi trillion dollar market in the years to come. Nucleus (NCL) has the potential to appreciate thousand of times over in the year and years ahead.

Lending programs are leading the way in the explosion of market capitalization the cryptocurrency sector is experiencing and Bitcoin Growth Bot has the first transparent real trading bot making it the perfect lending model.

3.1 Lending Program

Earn daily interest from the Nucleus lending program. Income solution for passive investors.

Nucleus Lending Interest

LENDING AMOUNT	INTEREST (ACCRUED DAILY)	CAPITAL BACK
\$100 - \$1,000	Volatility Algorithm Interest (up to 29% per month, avg 7-12%)	180 Days
\$1,010 - \$5,000	Volatility Algorithm Interest + 0.10% Daily (up to 29% per month, avg 7-12%)	150 Days
\$5,010 - \$10,000	Volatility Algorithm Interest + 0.15% Daily (up to 29% per month, avg 7-12%)	120 Days
\$10,010 - \$100,000	Volatility Algorithm Interest + 0.20% Daily (up to 29% per month, avg 7-12%)	90 Days

3.2 Nucleus Trading Program

Invest your wealth in community driven decentralized cryptocurrency. Using Waves' Dex decentralized exchange, you can buy, sell and trade Nucleus Coin (NCL) directly to and from each other on a decentralised exchange (DEX) with no central organization involvement.

3.3 Staking Program

Earning interest from owning Nucleus Coin while holding the coin for token appreciation. Holding Nucleus is where the real opportunity is and staking can bring you extra profit from holding Nucleus (NCL).

3.4 Affiliate Program

The smartest way to launch a program is with a multi level marketing (mlm) affiliate program. This takes away pressure on our capital from marketing during the initial growth stage and allows our user base to gain market share during the early stage before rapid appreciation of the Nucleus token. Our goal is to minimize costs wherever possible without sacrificing efficiency in all aspects of our business.

4 Roadmap & Business Development

Time Period	Proposed Features
Progress to Date	<ul style="list-style-type: none">• Project envision
4Q16 - 3Q17	<ul style="list-style-type: none">• Market research on viability of project• Development of automated algorithm• Draft of white paper• Team formation• Live working prototype of algo
4Q17	<ul style="list-style-type: none">• Final draft of white paper• Release final draft of white paper• Announce ICO Presale• Further operations and legal set up• ICO Presale• Hire key staff:<ul style="list-style-type: none">– Blockchain Security Expert– Chief Financial Officer– Front End Engineer– Certified Public Accountant (CPA)– Chief Technology Office• Announce ICO crowdsale• Open Trading on DEX Decentralised Exchange

Time Period	Proposed Features
1Q18	<ul style="list-style-type: none">• Launch Bitcoin Growth Bot• Nucleus: ICO• Hire key staff:<ul style="list-style-type: none">– Software Engineer – Crypto/Payments– Senior Backend Engineer– Communications Director• Open Backend to Users• Open Bitcoin Growth Bot Lending Program• Nucleus: ICO• Marketing Campaign & Promotion• Listing on Coin Directories• Open Android & IOS Apps• Nucleus: ICO• Marketing Campaign & Promotion• Listing on Coin Directories
2Q18	<ul style="list-style-type: none">• Liquidity Providers added to Bitcoin Growth Bot• Promotions to Crypto Community• Security Improvements & Systems Upgrade• Nucleus: ICO• AI Development Team
3Q18	<ul style="list-style-type: none">• Aggressive Marketing Campaign• Release Bitcoin Growth Bot 2.0

Note: The roadmap above can and likely will change, especially as the competitive market landscape shifts. The roadmap is intended as an outline for how Bitcoin Growth Bot intends to continue executing and expanding to achieve maximum profitability.

5 Conclusion

Bitcoin Growth Bot is proposing the creation of a new ecosystem that will improve the long term viability of the cryptocurrency sector as a whole through a next generation lending program. The lending model is already proven and extremely robust for investors. What was missing is transparency, which is everything.

Thank you for your interest in the Bitcoin Growth Bot. For more information please see updated details on our website <http://www.bitcoingrowthbot.io/>
