• About Riseconnect

Riseconnect has been conceived from the desire to break with the status quo scheme, creating a new way of moving the economy towards everyone, and the best part ¡Free from government and intermediaries!

As a self-regulated financial payment and investment fund that wants to be independent, without governmental or private intermediaries, our network runs without having a central server, so all transactions are from person to person.

And they're also anonymous, which means that you won't need to register and that there's no third parties involved, everything you're going to need is a client software and a wallet address. ¡That's it!

• Mission

Our mission is to position ourselves as the most used investment platform on the cryptocurrency world. Offering to our users a highly profitable and sustainable investment modality in the market and so demonstrate our professionalism and ambition.

Based on the pillars of responsibility and the improvement of the world, we strategically design our business model in order to create a sustainable and viable economy over the years, positioning ourselves as number one in the short and long term.

• Vision

Riseconnect will be a world class currency, leader in the category of cryptocurrency oriented to the generation of value and sustainability, with focus on the production and optimization of it, committed to its users and the economy of the future. Evolving in a respected and reliable way being recognized within its competence.

Our long-term vision is to be a coin of regular use when the market of cryptocurrency becomes massive. Where people can deposit their money with full confidence, giving them stability, profitability and growth of their capital. Our future marketing strategy will help to attract more people to be integrated into the world of cryptocurrency, to our platform and to massify our business.

We believe that education is the basis of the growth of this world and our business, so in the future we will focus on educating people in an agile and didactic way so that it integrates with us.

• About RiseCoin (RIC)

The RIC supply will only have 30 millions of coins. The number of coins is limited, so you must be pending at the moment we start to selling these. We'll manage a deflationary economy to ensure all our users the increase price of our currency in the long term.

The PoW system will give security to our network, stability and legitimacy. Our blockchain is totally protected against hackers. It's one of the advantages of being decentralized and with the highest security technology.

• ICO

The initial coin offering (ICO) of Riseconnect will be launched on December 10 until December 25, 2017 by selling 6,000,000 RICs for 15 days.

The ICO is divided into 5 Phases, which will take place at three-day intervals.

All RICs that are not sold in each of the phases will be frozen, reserved and will be burned at the end of the ICO.

• Goals

Some of ICO's funds will be used to begin the development of our objectives from 2018 and 2019. Also these funds will be used for the creation of new marketing strategies and partners that generate confidence and commitment to our brand, being beneficial to the Riseconnect platform and the development of all the objectives that we have planned to Future.

During 2018 we will give the news of these new goals and they will be in the roadmap. Stay connected.

Our investment opportunities

1 Trading

You can negotiate your Ric's in the external and internal exchanger, besides create your own buying and selling strategies to obtain incredible benefits. We'll give you all the tools of an advanced exchanger and a 24-hour technical support exclusively for users of our internal exchanger for a lower commission rate.

2 Lending

Invest your RIC's in our lending platform and generate daily benefits. The more you invest your assured daily benefits, will be faster the recuperation of your initial capital. When you complete the days of your lending, you will receive the return of your initial capital.

We manage a volatility software based on BTC to generate daily profits. The percentage of profits generated by the volatility software is determined by the fluctuations of the BTC market.
