1.Introduction

What Is Zecta Coin (ZCT)? How Does Zecta Coin (ZCT) works?

What is the value of Zecta Coin (ZCT) ?

What is Zecta Coin?

Zecta Coin (ZCT) is an open source public block chain based on cryptocurrency featuring smart contracts with online shopping platforms.

How does Zecta Coin Works?

Zecta Coin works exactly like Bitcoin. It will be used as a mode of payment in the future. Currently, it can be exchanged in Bitcoin and can be sent anywhere in the world.

What is the value of Zecta Coin?

The value of Zecta Coin depends upon the supply and demand of Zecta coins. It has a total supply of 84,000,000. The current availability of coins supplied in the market is 21,000,000. The current value of Zecta Coin is \$0.60. The price of Zecta Coin is expected to increase to \$0.90 once it goes to the open market.

How will the price of Zecta Coin increase?

The introduction of our staking program will encourage people to hold and store Zecta Coins for about 6 to 10 months. The buyers will receive monetary rewards every month. Zecta Coins will further grow organically through smart contracts with online shopping platforms.

What price can you expect?

Just like any cryptocurrency, the price of Zecta Coin cannot be predicted or guaranteed. However, owing to our team efforts, progress, member trust and strong marketing, we can expect the price to hit \$40 by the end of March 2018, and \$100 by the end of September 2018.

What can I do with Zecta Coin?

After the Initial Coin Offering, Zecta Coin can be used for the following:

- 1. Trade in Exchanges such as Yobit (December 2017), Livecoin (January 2018) and Bittrex (April 2018),**
- 2. Stack Zecta Coins to earn monthly profits.**
 - 15% monthly profit if you hold Zecta Coins for 6 months.**
 - 16% monthly profit if you hold Zecta Coins for 8 months.**
 - 20% monthly profit if you hold Zecta Coins for 10 months**

Use in E-Commerce

Zecta is a blockchain-based solution for e-commerce that allows companies to decrease their e-commerce related losses due to the actions of dishonest customers during charge backs or cardless transactions through the use of smart contracts. According to research findings, in 2016 approximately 8% of e-commerce revenue was lost to fraudulent activity, and almost 40% of all attempted transactions did not result in purchases.

Zecta will help solve these problems, lower costs, and increase security for all of the ecosystem's participants: consumers of goods and services, who place orders within the system; suppliers, who provide these goods and services; and arbitrators, who resolve complicated situations between other users.

Zecta developers have already begun working on mobile app. Using geolocations and smart matchings, the app will offer users a sorted list of people and organisations ready to sell the services they need. The funds raised during the ICO will be put forward towards further product development.

Payment with Zecta Coins

Zecta tokens (ZCT) will become an universal medium for all transactions within the system. It will be used as a means of value exchange for payments not just within the system, but also in apps based on the Zecta platform. The cost of goods and services will be given in US dollars, which will be instantaneously converted into tokens by an external service.

"Zecta tokens are not a security or crypto currency. We don't see it as a means for speculation. Nevertheless, tokens are an important element of our system that will be needed by all participants in these relationships. The team's goal is to ensure the ease and security of goods exchange through the use of ZCT tokens," explains team Zecta.

Fundraising will start from 5th of November, 2017 and will continue for 5 weeks . The company plans to raise \$13 million during ICO.

About Zecta

Zecta is a blockchain as a service solution that can be easily integrated into any existing e-commerce. The main goal of the project is to help all e-commerce stores to save money they lose on fraud transactions. Zecta service allows all e-commerce stores to deal with their Consumers using a smart contract, which helps stores to reduce fraud and to have transactions be more secure for the Consumers. Every e-commerce can reduce the costs of its goods/services for the Consumer and become more competitive on the market by reducing the expenses on fraud. We create the universal discount system for all e-commerce worldwide and provide the user acquisition with the help of the Zecta model.
